EE 720: Introduction to Number Theory and Cryptography (Spring 2018)
Instructor: Saravanan Vijayakumaran
Indian Institute of Technology Bombay

Assignment 2: 10 points Date: January 23, 2018

Find the pdf file corresponding to your roll number in the directory `https://www.ee.iitb.ac.in/~sarva/courses/EE720/2018/assignments/assignment2/`. Upload the answers as a **pdf** file in Moodle. Use the tex file provided in the directory to fill in your answers. The **upload deadline** will be 11:00pm IST on Wednesday, January 31, 2018.

1. [5 points] Consider a variant of the one-time pad with message space $=\{0,1\}^l$ and keyspace $\mathcal{K}$ restricted to all l-bit strings with an even number of 1's. Is this scheme perfectly secret? Justify your answer either with a proof or a counterexample.

   Solution: Write your answer here

2. [5 points] State whether the following encryption scheme is perfectly secret or not. Justify your answer either with a proof or a counterexample.

   The message space is $\mathcal{M} = \{0, \ldots, 4\}$. Algorithm `Gen` chooses a uniform key from the keyspace $\{0, \ldots, 5\}$. $\texttt{Enc}_k(m) = (k + m) \bmod 5$ and $\texttt{Dec}_k(c) = (c - k) \bmod 5$.

   Solution: Write your answer here
