

Find the pdf file corresponding to your roll number in the directory <https://www.ee.iitb.ac.in/~sarva/courses/EE720/2018/assignments/assignment2/>. Upload the answers as a **pdf** file in Moodle. Use the tex file provided in the directory to fill in your answers. The **upload deadline** will be 11:00pm IST on Wednesday, January 31, 2018.

1. [5 points] Consider a variant of the one-time pad with message space $=\{0,1\}^l$ and keyspace \mathcal{K} restricted to all l -bit strings with an even number of 1's. Is this scheme perfectly secret? Justify your answer either with a proof or a counterexample.

Solution: Write your answer here

2. [5 points] State whether the following encryption scheme is perfectly secret or not. Justify your answer either with a proof or a counterexample.

The message space is $\mathcal{M} = \{m \in \{0,1\}^l \mid \text{the last bit of } m \text{ is } 0\}$. Algorithm **Gen** chooses a uniform key from the keyspace $\{0,1\}^{l-1}$. $\text{Enc}_k(m) = m \oplus (k\|0)$ and $\text{Dec}_k(c) = c \oplus (k\|0)$.

Solution: Write your answer here
