EE 720: Introduction to Number Theory and Cryptography (Spring 2018)
Instructor: Saravanan Vijayakumaran
Indian Institute of Technology Bombay

Assignment 2: 10 points                                           Date: January 23, 2018

Find the pdf file corresponding to your roll number in the directory `https://www.ee.iitb.ac.in/~sarva/courses/EE720/2018/assignments/assignment2/`. Upload the answers as a **pdf** file in Moodle. Use the tex file provided in the directory to fill in your answers. The **upload deadline** will be 11:00pm IST on Wednesday, January 31, 2018.

1. [5 points] Let $\texttt{negl}_1$ be a negligible function. Prove that for any positive polynomial $p$, the function $\texttt{negl}_2$ defined by $\texttt{negl}_2(n) = p(n) \cdot \texttt{negl}_1(n)$ is negligible.

   **Solution:** Write your answer here

2. [5 points] State whether the following encryption scheme is perfectly secret or not. Justify your answer either with a proof or a counterexample.

   The message space is $\mathcal{M} = \left\{ m \in \{0,1\}^l \mid \text{the last bit of } m \text{ is } 0 \right\}$. Algorith `Gen` chooses a uniform key from the keyspace $\{0,1\}^{l-1}$. $\texttt{Enc}_k(m) = m \oplus (k\|0)$ and $\texttt{Dec}_k(c) = c \oplus (k\|0)$.

   **Solution:** Write your answer here
